SPIROMETRY

The following is a summary of Current Procedural Terminology (CPT) codes commonly used for spirometry procedures performed with a Midmark spirometer. This information is provided only as a guide and is not intended to replace any official recommendations or guidelines, and does not constitute a promise or guarantee by Midmark regarding coverage or payment. Always check with the specific payer for the appropriate use of any CPT or ICD-10 codes. Physician fee schedule values listed+ are based on a national average and are rounded for brevity. Specific payments vary geographically. Codes and rates are subject to change. It is the responsibility of the provider to determine the correct coding for services provided.

Procedure	CPT Code	When to Charge	Description	National Average*
FVC	94010	Expiratory spirometry only	Spirometry including graphic record, total and timed vital capacity, expiratory flow rate measurement(s), with or without maximal voluntary ventilation	\$36
	<ul style="list-style-type: none"> Do not report 94010 in conjunction with 94150, 94200, 94375, 94728
